Project Nos.
P-020022A, P-020022B, P-020022C, P-020022D, and P-020022E

Date Prepared:
June 11, 2002

Permit Status:
FINAL
PURPOSE

The purpose for this memorandum is to satisfy the requirements of IDAPA 58.01.01.200, Rules for the Control of Air Pollution in Idaho for issuing permits to construct (PTC).

PROJECT DESCRIPTION

Staker & Parsons Co., d.b.a. Idaho Concrete Co., Portable Sources (Idaho Concrete) is proposing to amend the following PTCs issued May 15, 1996:

- No. 777-00034
- No. 777-00147
- No. 777-00148
- No. 777-00149
- No. 777-00150

These concrete batch plants were recently purchased from Monroc Inc. There are no changes in operation associated with this amendment.

SUMMARY OF EVENTS

On June 3, 2002, the Department of Environmental Quality (DEQ) received an application from Idaho Concrete for a name change on five concrete batch plant permits.

DISCUSSION

1. Process Description

   The process has not changed; there has only been a change in ownership. The equipment and method of operation have not changed and there are no changes in emissions.

2. Emission Estimates and Modeling

   Emissions have not increased; therefore, no modeling was conducted for this amendment. For previous modeling, see the associated technical memorandums from the previous permits.

3. Facility Classification

   These facilities are classified as natural minor "B" facilities, since their potential to emit is less than the following:

   - 100 tons per year (T/yr) of any regulated pollutant
   - 10 T/yr of any single hazardous air pollutant
   - 25 T/yr of any combination of hazardous air pollutants
4. **Area Classification**

These are portable sources permitted to operate in any attainment or unclassifiable area in Idaho.

5. **Regulatory Review**

IDAPA 56.01.01.201 Permit to Construct Required

These are not modifications since there is no change in emissions; therefore, a new PTC is not required.

6. **AIRS Information**

³ Aerometric Information Retrieval System (AIRS) Facility Subsystem (AFS)

⁴ AIRS/AFS Classification Codes:

A = Actual or potential emissions of a pollutant are above the applicable major source threshold. For NESHAP only, class "A" is applied to each pollutant that is below the 10 T/yr threshold, but which contributes to a plant total in excess of 25 T/yr of all NESHAP pollutants.

SM = Potential emissions fall below applicable major source thresholds if and only if the source complies with federally enforceable regulations or limitations.

B = Actual and potential emissions below all applicable major source thresholds.

C = Class is unknown.

ND = Major source thresholds are not defined (e.g., radionuclides).

⁵ State Implementation Plan

⁶ Prevention of Significant Deterioration

⁷ New Source Performance Standards

⁸ National Emission Standards for Hazardous Air Pollutants

⁹ Maximum Achievable Control Technology

¹⁰ Sulfur Dioxide

¹¹ Nitrogen Oxides

¹² Carbon Monoxide

¹³ Particulate matter with an aerodynamic diameter less than or equal to a nominal 10 micrometers

¹⁴ Particulate Matter

¹⁵ Volatile Organic Compounds

¹⁶ Hazardous Air Pollutants
FEES

The Idaho Concrete plants are not major facilities as defined in IDAPA 58.01.01.008.10. Therefore, registration fees are not applicable in accordance with IDAPA 58.01.01.527.

RECOMMENDATION

Based on review of application materials and all applicable state and federal rules and regulations, staff recommends Idaho Concrete be issued amended PTC Nos. 777-00034, 777-00149, 777-00148, 777-00147, and 777-00150 for the concrete batch plants. No public comment period is recommended, no entity has requested a comment period, and the project does not involve PSD requirements.
