Re: Approval of the Black Lake Total Maximum Daily Load (HUC: 17010303PN009_0L)

Dear Mr. Burnell and Mr. Cernera:

Today the U.S. Environmental Protection Agency, in accordance with its authority under Section 303(d) of the Clean Water Act, 33 U.S.C. § 1313(c)(3), is taking final action on the Black Lake Total Maximum Daily Load. For state waters, the EPA is approving one TMDL for the Black Lake Watershed; and on behalf of the Coeur d'Alene Tribe, the EPA is issuing the same TMDL for reservation waters.

The Idaho Department of Environmental Quality (IDEQ) and the Tribe submitted a Black Lake Watershed Subbasin Assessment and TMDL to the EPA on March 31 and March 16, 2011, respectively. The boundary of the Coeur d'Alene Reservation passes through the lake. Through a collaborative process the Tribe and State developed a joint TMDL, which addresses the specific water and pollutant listed below:

Clean Water Act Section 303(d) Segments in the Black Lake Watershed

<table>
<thead>
<tr>
<th>Water Body</th>
<th>Assessment Unit</th>
<th>ID Number</th>
<th>Boundaries</th>
<th>Pollutant</th>
<th>Listing Basis</th>
</tr>
</thead>
<tbody>
<tr>
<td>Black Lake</td>
<td></td>
<td>ID17010303PN009_0L</td>
<td>Entire lake</td>
<td>Phosphorus</td>
<td>Cultural eutrophication</td>
</tr>
</tbody>
</table>

The Tribe and IDEQ also developed and submitted implementation strategies along with the TMDL pursuant to the TMDL Settlement Agreement of July 2002. The EPA has no duty to approve or disapprove implementation strategies; therefore, the EPA is not taking action on these strategies. Implementation is the critical next step to realize improvements in water quality, and we encourage the Tribe and IDEQ to continue their joint efforts to work with responsible parties on implementation of these strategies.

The load allocations in the proposed TMDL will, when fully implemented, lead to the attainment of the water quality standards. Therefore, IDEQ and EPA and the Tribe can place the waterbody in category 4a of the Integrated Report for the pollutant covered in this TMDL. Once beneficial uses are attained and standards are met, the waterbody can be placed in Category 2 of the Integrated Report.
In closing I would like to recognize the outstanding joint work of Kristin Keith, Bob Steed and Scott Fields, State and Tribal staff, who developed this TMDL and addressed very challenging issues in a watershed of joint jurisdiction with a long legacy of severe degradation. By the EPA’s approval, this TMDL is now incorporated into the State’s Water Quality Management Plan under §303(e) of the CWA.

If you have any comments or questions, please feel free to call me at (206) 553-4198, or you may call Don Martin of my staff at (208)-665-0458.

Sincerely,

Michael A. Bussell, Director
Office of Water and Watersheds
