Boise, Idaho 83706-1255

Re: Approval of the Salt River Subbasin Bacteria TMDLs (HUC: 17040105)

Dear Mr. Burnell:

The Idaho Department of Environmental Quality (IDEQ) submitted the Salt River Subbasin E. coli bacteria and sediment Total Maximum Daily Loads (TMDLs) to the U.S. Environmental Protection Agency on August 24, 2015, and updated TMDLs that revised the sediment wasteload allocations on August 2, 2017. The EPA will be making a decision on the sediment TMDLs through a separate action. Following our review, the EPA is pleased to approve five *Escherichia coli* (*E. coli*) TMDLs. Four of these waters were included in Idaho’s 2014 303(d) list (List) of impaired waters, as identified in Table 1.

IDEQ completed an *E. coli* TMDL for Lower Stump Creek, ID17040105SK006 04 which was not meeting water quality standards for *E. coli*, but had not previously been included on Idaho’s Category 5 List of impaired waters (List) needing a TMDL for *E. coli*. The EPA understands that Lower Stump Creek, ID17040105SK006 04 would have been included on the List for the *E. coli* impairment had the State been aware of the impairment at the time the List was completed.

Our review indicates that these allocations have been established at a level that, when fully implemented, will lead to the attainment of the water quality standards addressed by these TMDLs. Therefore, the IDEQ does not need to include these waters on the next 303(d) list of impaired waters for the pollutant(s) covered by these TMDLs.

This approval only includes those waters for which a TMDL was completed and does not constitute approval for the proposed de-listing of waters within Hydrologic Unit Code 17040105 from the Idaho §303(d) list. Any proposed de-listing of waters will be considered at the time of submission of the next §303(d) list of impaired waters.

IDEQ’s submittal also included implementation strategies for the TMDLs that were developed and submitted pursuant to the TMDL Settlement Agreement of July 2002. The EPA has no duty to approve or disapprove implementation strategies under Section 303(d) of the Clean Water Act (CWA); therefore, the EPA is not
taking action on these strategies. Implementation is the critical next step to realize improvements in water quality, and we encourage IDEQ to continue their work with responsible parties on implementation of these strategies.

We would like to recognize Hannah Harris for her dedication in developing these TMDLs and bringing them to completion.

By the EPA’s approval, these TMDLs are now incorporated into the State’s Water Quality Management Plan under §303(e) of the CWA. If you have any comments or questions, please feel free to call me at (206) 553-1855, or you may call Jayne Carlin of my staff at (206) 553-8512.

Sincerely,

Daniel D. Opalski, Director
Office of Water and Watersheds
