Idaho Permit Issuance Plan for Calendar Year 2027

The Idaho Department of Environmental Quality's (DEQ's) permit issuance plan for calendar year 2027 provides the regulated community, United States Environmental Protection Agency (EPA), and other state, federal, tribal, and interested organizations with information regarding permits being developed by DEQ's Idaho Pollutant Discharge Elimination System (IPDES) Bureau. This list serves as a guide for prioritizing permit development, although special circumstances may result in deviation from the schedule (e.g., new sources or dischargers, application withdrawals or Notices of Terminate, or total maximum daily load [TMDL] changes).

Individual facilities are rated based on the following criteria:

- Type of facility applying for permit
- Length of time a facility has been waiting to be issued its first permit
- Length of time until an existing permit expires
- Length of time a permit has been administratively continued
- Receiving water beneficial use status
- Facility compliance history
  - Number of significant noncompliance issues during past permit cycle
  - Number of reporting noncompliance issues during past permit cycle
- Facility classification as a major or a minor discharger
- Number of drinking water system intakes within 500 feet downstream of a facility's discharge point
- Changes affecting the facility's current discharge permit
- Potential environmental impact associated with issuing or not issuing a permit, including expected water quality benefits or risks to beneficial uses

Permit Issuance for Individual IPDES Permits

Table 1, Table 2, and Table 3 identify Publicly Owned Treatment Works (POTW) and non-POTW (Industrial and Private Domestic Treatment Works (PDTW)) permit development status for pending (new) and administratively continued permits:

- Development—Permits DEQ are actively developing and expects to issue soon
- 2027 Priority—Permits DEQ intends to move into development this year
- Queue—In queue to be assigned and prepared
- On Hold—On hold due to specific circumstances (e.g., inactive discharge, etc.)

Permits are listed in order of highest priority scoring. Although these tables generally guide the permit development prioritization, permits may be and often are developed out of order due to specific circumstances (e.g., discharging to shared waterbodies, draft permit development was already in progress, changes to waterbody impairments or facility operations, etc.).

Effective IPDES Individual Permits

Table 4 lists individual POTW permits, and Table 5 lists the individual non-POTW permits in Idaho that are *Effective*, organized by expiration date. IPDES compliance officers contact permittees in the *Effective* status at least 12 months prior to the permit expiration date, reminding them to prepare and submit a renewal application if they wish to continue discharging under an IPDES permit.
