

# IPDES Permit Issuance Plan

Calendar Year 2022

State of Idaho  
Department of Environmental Quality  
November 2021

## Idaho Permit Issuance Plan for Calendar Year 2022

The Idaho Department of Environmental Quality's (DEQ's) permit issuance plan for calendar year 2022 provides the regulated community, US Environmental Protection Agency (EPA), and other state, federal, tribal, and interested entities with information on permits being worked on by DEQ's Idaho Pollutant Discharge Elimination System (IPDES) Bureau. Permits are assigned to IPDES permit writers according to this list, barring special circumstances that may arise (e.g., New Source or Discharger submitting an application, applicant submitting a letter of application withdrawal or Notice of Intent to Terminate (NOT), or active total maximum daily load [TMDL] changes).

Individual facilities were rated based on the following criteria:

- Type of facility applying for a permit
- Length of time the facility has been waiting to be issued its first permit (number of months in pending status)
- Length of time before an existing permit expires
- Length of time the permit has been administratively continued
- Receiving water beneficial use status
- Facility compliance history
  - Number of significant noncompliance issues accrued during past permit cycle
  - Number of reporting noncompliance issues accrued during past permit cycle
- Facility classification as a major or a minor discharger
- Number of drinking water system intakes within 500 feet downstream of the facility's discharge point

### Permit Issuance for Individual IPDES Permits

Authority for issuing Publicly Owned Treatment Works (POTW) permits was delegated to DEQ on July 1, 2018. Authority for issuing non-POTW permits was delegated to DEQ on July 1, 2019. Table 1 and Table 2 identify POTW and non-POTW permit draft statuses:

- Assigned—assigned to permit writers
- Development—actively being prepared
- Queue—in queue to be assigned and prepared
- On Hold—on hold due to specific circumstances (e.g., inactive discharge, etc.)

Some non-POTW permits process domestic wastewater and are issued permits that mirror POTW requirements using best professional judgement (BPJ). DEQ may assign these facilities to permit writers before other categories of non-POTW facilities due to the permit writers' experience addressing POTWs and the anticipated minimal number of pollutants of concern in wastewater.

**Table 1. 2022 POTW permit development list.**

a. HUCs identified by the National Marine Fisheries Services (NMFS) as part of the conservation measures for EPA's approval of Idaho Mixing Zone Rules.

b. HUCs identified by the US Fish and Wildlife Service (FWS) that contain ESA-listed species or critical habitat.

c. Will be covered in the new General Permit for Commercial Hot Spring Facilities (IDG400000), listed in Table 5.

## **Listing of Effective IPDES Individual Permits**

Table 3 lists individual POTW permits, and Table 4 lists the individual non-POTW permits in Idaho that are “Effective.” Facilities are sorted by expiration date, which highlights those expected to compile and submit a renewal application in the coming months. This feature prompts the IPDES compliance officer to contact the facility and provide assistance with compiling and submitting a complete renewal application, and assists the IPDES permit supervisor with forecasting and scheduling work assignments for the IPDES permit writers. Permittees in the “Effective” status are contacted at least 12 months prior to the permit expiration date, reminding them to prepare and submit a renewal application if they wish to continue to discharging under an IPDES permit.

**Table 3. Effective POTW permit list.**

| IPDES ID  | Permit Name   | Expiration Date | Receiving Water [HUC] <sup>a,b</sup>                   |

## **General Permits and Storm Water Permits**

Authority for issuing non-storm water general permits was delegated to DEQ on July 1, 2020. Authority for issuing storm water individual and general permits was delegated to DEQ on July 1, 2021. Table 5–Table 7 identify general permit and storm water permit draft statuses:

- Assigned—assigned to permit writers
- Development—actively being prepared
- Queue—in queue to be assigned and prepared
- On Hold—on hold due to specific circumstances (e.g., inactive discharge, etc.).

DEQ’s plan to address these permits appears in the Comments column.

**Table 5. 2022 Non-storm water general permit development list.**
