

Twin Falls Woodstove Change-Out Program Homeowner Application Information Sheet

The Twin Falls Woodstove Change-Out Program is offering rebates up to \$3,000 for a woodstove change-out in the county of Twin Falls (Figure 1). Old wood-burning appliances will be replaced with new US Environmental Protection Agency (EPA)-certified freestanding woodstoves and inserts; new EPA-certified wood pellet freestanding stoves and inserts; or natural gas/propane heating appliances (Table 1).

To qualify for a rebate, applicants must own their home and complete the homeowner application. If a homeowner rents the residence, a completed and signed Homeowner/Tenant Agreement form is also required.

Applications will be accepted as funding is available and processed in the order received. Funding is limited and **not** guaranteed. If you have questions, call the Twin Falls Regional Office at (208) 736-2190 or email Heidi.Orr@deq.idaho.gov.

Homeowners must provide photos of the existing heating appliance with the completed application before removal. Photos must show the following features:

- Existing wood-heating appliance (insert and freestanding)
- Current EPA certification tag (if present)
- Name plate with model information (if present)
- Front view of woodstove (installed in home, prior to removal)

If accessing the back of the woodstove insert is difficult, contact DEQ for assistance.

Completed applications must be signed by the homeowner and mailed to DEQ's Twin Falls Regional Office, 650 Addison Avenue West, Suite 110, Twin Falls, ID 83301 or emailed to Heidi.Orr@deq.idaho.gov. Qualified homeowners will receive a rebate redeemable through a participating vendor on a first-come first-served basis subject to available funds, up to the amounts shown in Table 1.

Table 1. Allowable replacements and rebate amounts for all households in Twin Falls.

Existing Device	New Device	Maximum Rebate Amount (\$)
Non-EPA-certified wood appliance	New EPA-certified wood or pellet appliance	2,000
Non-EPA-certified wood appliance	Qualifying natural gas or propane appliance	3,000
EPA-certified wood or pellet appliance manufactured before 2001	Qualifying natural gas or propane appliance	3,000

Approved homeowners will choose a participating vendor from DEQ's Approved Participating Vendor List. No self-installations are allowed. If the homeowner wishes to use a vendor not on the list, the vendor must submit an application to DEQ to become a participating vendor before the homeowner purchases the device. Homeowners work directly with a participating vendor to remove their existing wood- or pellet-heating appliance and install the new unit. After installation, DEQ will reimburse the participating vendor for each issued rebate once the homeowner signs the invoice cover sheet, attesting the appliance has been installed and is functioning.

Rebates are valid for 45 days from the date issued by DEQ.
