Mr. Henry Atencio, Warden
Management & Training Corporation
Idaho CAPP Facility
15505 South Pleasant Valley Road
Kuna, Idaho 83634

Subject: Management & Training Corporation – Idaho CAPP Facility
Reuse Permit No. M-222-03 Modification 1

Dear Mr. Atencio:

On March 18, 2021, the Idaho Department of Environmental Quality (DEQ) received a request from Management & Training Corporation – Idaho CAPP Facility, to modify Reuse Permit M-222-03 by allowing crop moisture and nutrient content to be reported by using standard table values specified in the Quality Assurance Project Plan. DEQ is issuing a permit modification to Reuse Permit M-222-03. This modification, referred to as Modification 1, modifies crop harvest and plant tissue monitoring parameters.

This modification is a minor permit modification in accordance with Section 700.02.c of “Recycled Water Rules” (IDAPA 58.01.17) which allows “A change in monitoring or reporting frequency requirements, or revision of a laboratory method.” A draft permit modification for public review is not required in accordance with Section 700.02.

This permit modification is incorporated into, and constitutes a part of, Reuse Permit M-222-03. The Permit is incomplete and unlawful without this modification attached.

Henry Atencio
Idaho CAPP Facility
