## Idaho Permit Issuance Plan for Calendar Year 2024

The Idaho Department of Environmental Quality's (DEQ's) permit issuance plan for calendar year 2024 provides the regulated community, US Environmental Protection Agency (EPA), and other state, federal, tribal, and interested organizations with information regarding permits being developed by DEQ's Idaho Pollutant Discharge Elimination System (IPDES) Bureau. Permits are generally developed according to this list, although special circumstances may result in deviation from the schedule (e.g., new sources or dischargers, application withdrawals or Notices of Terminate, or total maximum daily load (TMDL) changes).

Individual facilities are rated based on the following criteria:

- Type of facility applying for a permit
- Length of time a facility has been waiting to be issued its first permit
- Length of time until an existing permit expires
- Length of time a permit has been Admin. cont.
- Receiving water beneficial use status
- Facility compliance history
  - Number of significant noncompliance issues during past permit cycle
  - Number of reporting noncompliance issues during past permit cycle
- Facility classification as a major or a minor discharger
- Number of drinking water system intakes within 500 feet downstream of a facility's discharge point
- Changes affecting facility's current discharge permit

### Permit Issuance for Individual IPDES Permits

Table 1 and Table 2 identify POTW (publicly and privately owned treatment works) and non-POTW<sup>1</sup> permit development statuses for *Pending* (new) and *Admin. cont.* permits:

- Development—assigned for permit preparation and/or actively being prepared
- Queue—in queue to be assigned and prepared
- On Hold—on hold due to specific circumstances (e.g., inactive discharge, etc.)

Permits are listed in order of highest priority scoring. Although these tables general guide the permit development prioritization, some permits may be developed out of order due to specific circumstances (e.g., discharging to shared waterbodies, draft permit development was already in progress, changes to waterbody impairments or facility operations, etc.).

Table 1. 2024 POTW permit development list.

## **Effective IPDES Individual Permits**

Table 3 lists individual POTW permits, and Table 4 lists the individual non-POTW permits in Idaho that are *Effective*, organized by expiration date. IPDES compliance officers contact permittees in the *Effective* status at least 12 months prior to the permit expiration date, reminding them to prepare and submit a renewal application if they wish to continue discharging under an IPDES permit.

## **General Permits and Storm Water Individual Permits**

Table 5–Table 7 identify general permit and storm water permit development statuses:

- Development— assigned for permit preparation and/or actively being prepared
- Queue—in queue to be assigned and prepared
- On Hold—on hold due to specific circumstances (e.g., inactive discharge, etc.).

DEQ’s plan to address these permits appears in the *Comments* column.
