Mary Ann,

Please change the rules to stop poisoning our acquifer. Read the studies that have already identified what will happen to our aquifer. Every neighbor I have talked with and many in Boise and other cities are very opposed. You have a very serious obligation to all of us. You must protect us. Thanks if you take this seriously.

Jim Zier. Star, Idaho

Meridian Tests Over The Limit.

Just found out that Meridian water has tested over the PFAS (forever chemicals) limit; that makes three companies in our area. At what point do we start limiting PFAS in direct injection to the aquifer and in other "treated" wastewater discharge?

There's been a lot of push back on Nextdoor that PFAS goes unchecked in septic systems too. Yes, forever chemicals can be in septic systems, but even if every home where to hook up to city sewer it won't stop the forever chemical contamination if the Department of Environmental Quality doesn't regulate these contaminates in wastewater discharge and require their removal.

This site has the PFAS test results information for much of Ada County:
