Subject: Recycled Water: Docket No. 58-0117-2601
Date: Tuesday, September 29, 2026 9:39:43 AM

CAUTION: This email originated outside the State of Idaho network. Verify links and attachments BEFORE you click or open, even if you recognize and/or trust the sender. Contact your agency service desk with any concerns.

Dear Ms. Nelson,

It is unthinkable that Idaho would weaken the permitting process for **treated municipal sewage wastewater ("recycled water").**

When treated sewage wastewater may be used on school grounds, parks, and other public areas, affect groundwater and drinking-water sources, we should be **strengthening testing, monitoring, transparency, and protections**, not creating broader exceptions to permit requirements.

Required information should not be waived from permit applications without clear guidelines and an explanation.

The rules should also address PFAS and other emerging contaminants and require appropriate groundwater, hydrology, and water-quality monitoring.

Please use this review to **strengthen protections for Idaho's drinking water, groundwater, and surface water.**

If these safeguards fail, it is Idaho residents and our children who will bear the consequences.

Clean water is our lifeblood.

DO NOT DILUTE CURRENT PERMIT LANGUAGE!

Sincerely,

Susan Wendt
