Soda Springs, ID 83276

RE: Facility ID No. 029-00003, Project No. 61979, Itafos Conda LLC, Soda Springs
Transfer of Ownership by Permit to Construct Revision

Dear Mr. Vedder III:

The Department of Environmental Quality (DEQ) is issuing Permit to Construct (PTC) No. P-2010.0002, Project 61979 to Itafos Conda LLC, located near Soda Springs for a transfer of ownership. This PTC is issued in accordance with IDAPA 58.01.01.209.04 of the Rules for the Control of Air Pollution in Idaho and is based on the certified information received on December 19, 2017. The transfer of ownership is based on the following information:

Previous Permittee Information
Permittee: Nu-West Industries, Inc., dba Conda Phosphate Operations
Mailing Address: 3010 Conda Road, Soda Springs, ID 83276
Facility Location: 7 miles north of Soda Springs, 1.2 miles east of Highway 34
Facility Contact: James Cagle
Phone Number: (208) 547-4381
Responsible Official: Eric Vettergren, Plant Manager
Phone Number: (208) 547-4381

Updated Permittee Information
Permittee: Itafos Conda LLC
Mailing Address: 3010 Conda Road, Soda Springs, ID 83276
Facility Location: 7 miles north of Soda Springs, 1.2 miles east of Highway 34
Facility Contact: Timothy A. Vedder III
Phone Number: (208) 909-5313
E-mail Address: timothy.vedder@agrium.com
Responsible Official: Timothy A. Vedder III, Manager
Phone Number: (208) 909-5313
This permit is effective immediately and replaces PTC No. P-2010.0002, issued March 25, 2010. This permit does not release Itafos Conda LLC from compliance with all other applicable federal, state, or local laws, regulations, permits, or ordinances.

In order to fully understand the compliance requirements of this permit, DEQ highly recommends that you schedule a meeting with Rick Elkins, Air Quality Analyst, at (208) 236-6160 to review and discuss the terms and conditions of this permit. Should you choose to schedule this meeting, DEQ recommends that the following representatives attend the meeting: your facility’s plant manager, responsible official, environmental contact, and any other staff responsible for day-to-day compliance with permit conditions.

If you have any questions, please contact Dan Pitman at 208.373.0502 or daniel.pitman@deq.idaho.gov.

Sincerely,

[Signature]

Mike Simon
Stationary Source Program Manager
Air Quality Division

MS/dp Permit No. P-2010.0002 PROJ 61979
Air Quality

PERMIT TO CONSTRUCT

Permittee: Itafos Conda LLC
Permit Number: P-2010.0002
Project ID: 61979
Facility ID: 029-00003
Facility Location: 3010 Conda Road
Soda Springs, ID 83276

Permit Authority
This permit (a) is issued according to the “Rules for the Control of Air Pollution in Idaho” (Rules), IDAPA 58.01.01.200–228; (b) pertains only to emissions of air contaminants regulated by the State of Idaho and to the sources specifically allowed to be constructed or modified by this permit; (c) has been granted on the basis of design information presented with the application; (d) does not affect the title of the premises upon which the equipment is to be located; (e) does not release the permittee from any liability for any loss due to damage to person or property caused by, resulting from, or arising out of the design, installation, maintenance, or operation of the proposed equipment; (f) does not release the permittee from compliance with other applicable federal, state, tribal, or local laws, regulations, or ordinances; and (g) in no manner implies or suggests that the Idaho Department of Environmental Quality (DEQ) or its officers, agents, or employees assume any liability, directly or indirectly, for any loss due to damage to person or property caused by, resulting from, or arising out of design, installation, maintenance, or operation of the proposed equipment. Changes in design, equipment, or operations may be considered a modification subject to DEQ review in accordance with IDAPA 58.01.01.200–228.

Date Issued: January 12, 2018

Dan Pitman, P.E., Permit Writer

Mike Simon, Stationary Source Manager

1. Permit Scope .................................................................................................................. 3
2. East Sulfuric Acid Plant .................................................................................................. 4
3. General Provisions .......................................................................................................... 7
1 Permit Scope

Purpose

1.1 This is a change of ownership permit transfer to Itafos Conda LLC from Nu-West Industries, Inc., dba Conda Phosphate Operations.

1.2 This PTC replaces Permit to Construct No. P-2010.0002, issued on March 25, 2010.

Regulated Sources

Table 1.1 lists all sources of regulated emissions in this permit.

<table>

<tbody>
<tr>
<td>East Sulfuric Acid Plant</td>
<td>Dual absorption and vertical tube mist eliminator</td>
</tr>
</tbody>
</table>
2 East Sulfuric Acid Plant

2.1 Process Description
The East Sulfuric Acid Plant receives elemental sulfur from offsite. The sulfur is combusted to form sulfur dioxide (SO₂). The sulfur dioxide is converted to sulfur trioxide (SO₃) in a series of four catalytic converters; the fourth converter includes a cesium catalyst. The SO₃ is converted to sulfuric acid in two absorption towers.

2.2 Control Device Descriptions

a) In absence of any other credible evidence, compliance is assured by complying with permit operating, monitoring, and record keeping requirements.
b) Pounds per hour, 3 hour rolling average, as determined by multiplying sulfuric acid production data by the CEM results required by 40 CFR 60.84, or DEQ-approved alternative.
c) Tons per 12 month rolling average (any 12 consecutive months).

[March 25, 2010]

2.4 Rules for Control of Sulfur Oxide Emissions from Sulfuric Acid Plants
No person shall allow, suffer, cause or permit the operation of any sulfuric acid plant which emits sulfur oxides (SOₓ) into the atmosphere in excess of twenty-eight (28) pounds per ton of 100% sulfuric acid produced in accordance with IDAPA 58.01.01.845-847.

Operating Requirements

2.5 Production Rate Limit
The East Sulfuric Acid Plant shall have a maximum daily production rate of 1,550 tons per day as 100% sulfuric acid.

[March 25, 2010]
Monitoring and Recordkeeping Requirements

2.6 Demonstration of Compliance with the SO\textsubscript{2} pound per hour and ton per year limits

The permittee shall:

- Each hour calculate and record the three-hour rolling average SO\textsubscript{2} emissions in pounds per hour as the product of pounds of SO\textsubscript{2} per ton of 100% H\textsubscript{2}SO\textsubscript{4} and tons of 100% H\textsubscript{2}SO\textsubscript{4} produced (each hour calculate arithmetic average of the proceeding three-hour period);
- Each calendar month calculate and record SO\textsubscript{2} emissions in tons per year as the sum of the preceding 12 months total emissions.
- All three-hour running average sulfur dioxide emissions shall be reported to DEQ in a calendar-quarterly report. The report shall be received by DEQ no later than 30 days after each calendar quarter. All repairs or changes to the continuous emission monitoring system and any calibration problem shall be reported to DEQ within 7 days and shall be included in the quarterly report.

[March 25, 2010]

2.7 Production Monitoring

Each day, the permittee shall monitor and record the production of the East Sulfuric Acid Plant in ton/day of 100% sulfuric acid.

[March 25, 2010]

Performance Testing Requirements

2.8 Sulfur dioxide and sulfuric acid mist emission tests shall be performed at least once during each 13-month period using EPA Reference Methods 1, 2, 3, and 8, or DEQ approved alternative methods. All emission tests shall be performed in accordance with IDAPA 58.01.01.157 with the exception that all source testing shall be conducted in accordance with a written and DEQ approved protocol. Visible emissions shall be observed and recorded during the emissions tests using EPA Reference Method 9. A minimum of 24 observations shall be recorded. The production rate in tons of 100% H\textsubscript{2}SO\textsubscript{4} per hour (T/hr) shall be recorded during each performance test; the production rate shall be included in each test report.

NSPS Requirements – 40 CFR 60 Subpart H

2.9 NSPS 40 CFR 60 Subpart H – Standard for Sulfur Dioxide

The owner or operator shall not cause to be discharged into the atmosphere from the East Sulfuric Acid Plant any gases which contain sulfur dioxide in excess of 2 kg per metric ton of acid produced (4 pounds per ton), the production being expressed as 100% H\textsubscript{2}SO\textsubscript{4}, in accordance with 40 CFR 60.82(a). Periods of excess emissions shall be all three-hour periods (or the arithmetic average of three consecutive one-hour periods) during which the integrated average sulfur dioxide emissions exceed the applicable standards, in accordance with 40 CFR 60.84(e).

2.10 NSPS 40 CFR 60 Subpart H – Standard for Acid Mist

Sulfuric acid mist emissions from the East Sulfuric Acid Plant shall not exceed 0.15 lb per ton of 100% sulfuric acid production in accordance with 40 CFR 60.83(a)(1) as determined by using the test methods and procedures specified in 40 CFR 60.85.
2.11 NSPS 40 CFR 60 Subpart H – Standard for Opacity

Visible emission limits from the East Sulfuric Acid Plant shall not exceed 10% opacity in accordance with 40 CFR 60.83(a)(2).

2.12 NSPS 40 CFR 60 Subpart A – Excess Emissions

Emissions in excess of the level of the applicable NSPS emission limits during periods of startup, shutdown, and malfunction shall not be considered a violation of the applicable emission limit, in accordance with 40 CFR 60.8(c).

[March 25, 2010]

2.13 NSPS 40 CFR 60 Subpart H – Emission Monitoring with CEMS

In accordance with 40 CFR 60.84(a), a continuous monitoring system for the measurement of sulfur dioxide shall be installed, calibrated, maintained, and operated by the owner or operator. The pollutant gas used to prepare calibration gas mixtures under Performance Specification 2 and for calibration checks under 40 CFR 60.13(d), shall be sulfur dioxide (SO₂). Method 8 shall be used for conducting monitoring system performance evaluations under 40 CFR 60.13(c) except that only the SO₂ portion of the Method 8 results shall be used. The span value shall be set at 1000 ppm of SO₂.

- A conversion factor shall be established for the purpose of converting monitoring data into units of the applicable standard (kg/metric ton, lb/ton). The conversion factor shall be determined, as a minimum, three times daily by measuring the concentration of sulfur dioxide entering the converter using suitable methods (e.g., the Reich test, National Air Pollution Control Administration Publication No. 999-AP-13) and calculating the appropriate conversion factor for each 8-hour period in accordance with 40 CFR 60.84(b).

- In accordance with 40 CFR 60.84(c), the owner or operator shall record all conversion factors and values under 40 CFR 60.84(b) from which they were computed (i.e., CF, r, and s).

- Alternatively, a source that processes elemental sulfur or an ore that contains elemental sulfur and uses air to supply oxygen may use the continuous emission monitoring approach and calculation procedures in determining SO₂ emission rates in terms of the standard in accordance with 40 CFR 60.84(d).

- In accordance with 40 CFR 60.84(e), for the purpose of reports under 40 CFR 60.7(c), periods of excess emissions shall be all three-hour periods (or the arithmetic average of three consecutive one-hour periods) during which the integrated average sulfur dioxide emissions exceed the applicable standards under 40 CFR 60.82.

[March 25, 2010]

2.14 Should there be a conflict between Permit Conditions 2.9-2.13 and 40 CFR 60 Subpart H, 40 CFR 60 Subpart H shall govern, including any amendments to that regulation.

[March 25, 2010]
3 General Provisions

General Compliance

3.1 The permittee has a continuing duty to comply with all terms and conditions of this permit. All emissions authorized herein shall be consistent with the terms and conditions of this permit and the “Rules for the Control of Air Pollution in Idaho.” The emissions of any pollutant in excess of the limitations specified herein, or noncompliance with any other condition or limitation contained in this permit, shall constitute a violation of this permit, the “Rules for the Control of Air Pollution in Idaho,” and the Environmental Protection and Health Act (Idaho Code §39-101, et seq.)

[Idaho Code §39-101, et seq.]

3.2 The permittee shall at all times (except as provided in the “Rules for the Control of Air Pollution in Idaho”) maintain in good working order and operate as efficiently as practicable all treatment or control facilities or systems installed or used to achieve compliance with the terms and conditions of this permit and other applicable Idaho laws for the control of air pollution.

[IDAPA 58.01.01.211, 5/1/94]

3.3 Nothing in this permit is intended to relieve or exempt the permittee from the responsibility to comply with all applicable local, state, or federal statutes, rules, and regulations.

[IDAPA 58.01.01.212.01, 5/1/94]

Inspection and Entry

3.4 Upon presentation of credentials, the permittee shall allow DEQ or an authorized representative of DEQ to do the following:

- Enter upon the permittee’s premises where an emissions source is located, emissions-related activity is conducted, or where records are kept under conditions of this permit;
- Have access to and copy, at reasonable times, any records that are kept under the conditions of this permit;
- Inspect at reasonable times any facilities, equipment (including monitoring and air pollution control equipment), practices, or operations regulated or required under this permit; and
- As authorized by the Idaho Environmental Protection and Health Act, sample or monitor, at reasonable times, substances or parameters for the purpose of determining or ensuring compliance with this permit or applicable requirements.

[Idaho Code §39-108]

Construction and Operation Notification

3.5 This permit shall expire if construction has not begun within two years of its issue date, or if construction is suspended for one year.

[IDAPA 58.01.01.211.02, 5/1/94]

3.6 The permittee shall furnish DEQ written notifications as follows:

- A notification of the date of initiation of construction, within five working days after occurrence; except in the case where pre-permit construction approval has been granted then notification shall be made within five working days after occurrence or within five working days after permit issuance whichever is later;
- A notification of the date of any suspension of construction, if such suspension lasts for one year or more; and
- A notification of the initial date of achieving the maximum production rate, within five working days after occurrence - production rate and date.

[IDAPA 58.01.01.211.01, 5/1/94]

- A notification of the anticipated date of initial start-up of the stationary source or facility not more than sixty days or less than thirty days prior to such date; and

- A notification of the actual date of initial start-up of the stationary source or facility within fifteen days after such date.

[IDAPA 58.01.01.211.03, 5/1/94]

**Performance Testing**

3.7 If performance testing (air emissions source test) is required by this permit, the permittee shall provide notice of intent to test to DEQ at least 15 days prior to the scheduled test date or shorter time period as approved by DEQ. DEQ may, at its option, have an observer present at any emissions tests conducted on a source. DEQ requests that such testing not be performed on weekends or state holidays.

3.8 All performance testing shall be conducted in accordance with the procedures in IDAPA 58.01.01.157. Without prior DEQ approval, any alternative testing is conducted solely at the permittee’s risk. If the permittee fails to obtain prior written approval by DEQ for any testing deviations, DEQ may determine that the testing does not satisfy the testing requirements. Therefore, at least 30 days prior to conducting any performance test, the permittee is encouraged to submit a performance test protocol to DEQ for approval. The written protocol shall include a description of the test method(s) to be used, an explanation of any or unusual circumstances regarding the proposed test, and the proposed test schedule for conducting and reporting the test.

3.9 Within 60 days following the date in which a performance test required by this permit is concluded, the permittee shall submit to DEQ a performance test report. The report shall include a description of the process, identification of the test method(s) used, equipment used, all process operating data collected during the test period, and test results, as well as raw test data and associated documentation, including any approved test protocol.

[IDAPA 58.01.01.157, 4/5/00 and 4/11/15]

**Monitoring and Recordkeeping**

3.10 The permittee shall maintain sufficient records to ensure compliance with all of the terms and conditions of this permit. Monitoring records shall include, but not be limited to, the following: (a) the date, place, and times of sampling or measurements; (b) the date analyses were performed; (c) the company or entity that performed the analyses; (d) the analytical techniques or methods used; (e) the results of such analyses; and (f) the operating conditions existing at the time of sampling or measurement. All monitoring records and support information shall be retained for a period of at least five years from the date of the monitoring sample, measurement, report, or application. Supporting information includes, but is not limited to, all calibration and maintenance records, all original strip-chart recordings for continuous monitoring instrumentation, and copies of all reports required by this permit. All records required to be maintained by this permit shall be made available in either hard copy or electronic format to DEQ representatives upon request.

[IDAPA 58.01.01.211, 5/1/94]
Excess Emissions

3.11 The permittee shall comply with the procedures and requirements of IDAPA 58.01.01.130–136 for excess emissions due to start-up, shut-down, scheduled maintenance, safety measures, upsets, and breakdowns.

[IDAPA 58.01.01.130–136, 4/5/00]

Certification

3.12 All documents submitted to DEQ—including, but not limited to, records, monitoring data, supporting information, requests for confidential treatment, testing reports, or compliance certification—shall contain a certification by a responsible official. The certification shall state that, based on information and belief formed after reasonable inquiry, the statements and information in the document(s) are true, accurate, and complete.

[IDAPA 58.01.01.123, 5/1/94]

False Statements

3.13 No person shall knowingly make any false statement, representation, or certification in any form, notice, or report required under this permit or any applicable rule or order in force pursuant thereto.

[IDAPA 58.01.01.125, 3/23/98]

Tampering

3.14 No person shall knowingly render inaccurate any monitoring device or method required under this permit or any applicable rule or order in force pursuant thereto.

[IDAPA 58.01.01.126, 3/23/98]

Transferability

3.15 This permit is transferable in accordance with procedures listed in IDAPA 58.01.01.209.06.

[IDAPA 58.01.01.209.06, 4/11/06]

Severability

3.16 The provisions of this permit are severable, and if any provision of this permit to any circumstance is held invalid, the application of such provision to other circumstances, and the remainder of this permit, shall not be affected thereby.

[IDAPA 58.01.01.211, 5/1/94]
