October 21, 2021

Patrick Dooley, Operations Manager
Pacific Recycling
19100 NW Waste Site Drive
Mayfield, Idaho 83716

RE: Facility ID No. 039-00030, Pacific Recycling, Mayfield
Final Permit Letter

Dear Mr. Dooley:

The Department of Environmental Quality (DEQ) is issuing Permit to Construct (PTC) No. P-2009.0072 Project 62688 to Pacific Recycling located at Mayfield for the permit modification to increase emissions from the hammer mill to account for minor explosions and to install a wire recycling, and aluminum sorter operation. This PTC is issued in accordance with IDAPA 58.01.01.200 through 228 (Rules for the Control of Air Pollution in Idaho) and is based on the certified information provided in your PTC application received August 31, 2021.

This permit is effective immediately and replaces PTC No. P-2009.0072 issued on August 11, 2009. This permit does not release Pacific Recycling from compliance with all other applicable federal, state, or local laws, regulations, permits, or ordinances.

Pursuant to the Construction and Operation Notification General Provision of your permit, it is required that construction and operation notification be provided. Please provide this information as listed to DEQ’s Boise Regional Office, 1445 N Orchard St., Boise, Idaho 83706, Fax (208) 373-0287.

In order to fully understand the compliance requirements of this permit, DEQ highly recommends that you schedule a permit handoff meeting with David Luft, Air Quality Manager, at (208) 373-0550 to review and discuss the terms and conditions of this permit. Should you choose to schedule this meeting, DEQ recommends that the following representatives attend the meeting: your facility’s plant manager, responsible official, environmental contact, and any other staff responsible for day-to-day compliance with permit conditions.
Pursuant to IDAPA 58.01.23, you, as well as any other entity, may have the right to appeal this final agency action within 35 days of the date of this decision. However, prior to filing a petition for a contested case, I encourage you to contact Christina Boulay at (208) 373-0502 or christina.boulay@deq.idaho.gov to address any questions or concerns you may have with the enclosed permit.

Sincerely,

Mike Simon  
Stationary Source Bureau Chief  
Air Quality Division

MS\cb

Permit No. P-2009.0072 PROJ 62688

Enclosures
Permit Authority

This permit (a) is issued according to the “Rules for the Control of Air Pollution in Idaho” (Rules), IDAPA 58.01.01.200–228; (b) pertains only to emissions of air contaminants regulated by the State of Idaho and to the sources specifically allowed to be constructed or modified by this permit; (c) has been granted on the basis of design information presented with the application; (d) does not affect the title of the premises upon which the equipment is to be located; (e) does not release the permittee from any liability for any loss due to damage to person or property caused by, resulting from, or arising out of the design, installation, maintenance, or operation of the proposed equipment; (f) does not release the permittee from compliance with other applicable federal, state, tribal, or local laws, regulations, or ordinances; and (g) in no manner implies or suggests that the Idaho Department of Environmental Quality (DEQ) or its officers, agents, or employees assume any liability, directly or indirectly, for any loss due to damage to person or property caused by, resulting from, or arising out of design, installation, maintenance, or operation of the proposed equipment. Changes in design, equipment, or operations may be considered a modification subject to DEQ review in accordance with IDAPA 58.01.01.200–228.

1 Permit Scope

Purpose

1.1 This is a modified permit to construct (PTC) to increase emissions from the hammer mill to account for minor explosions and to install a wire recycling operation.

1.2 Those permit conditions that have been modified or revised by this permitting action are identified by the permit issue date citation located directly under the permit condition and on the right-hand margin.

1.3 This PTC replaces Permit to Construct No. P-2009.0072 issued on August, 11, 2009.

Regulated Sources

Table 1.1 lists all sources of regulated emissions in this permit.

2 Hammer Mill

2.1 Process Description
The hammer mill processes household appliances, scrap metal recovered from landfill excavations, and approximately 75% pre-crushed automobiles. Occasionally the hammer mill will process propane tanks resulting in occasional explosions.

2.2 Control Device Descriptions
The hammer mill is equipped with a factory installed variable water injection system for particulate control.

a) In absence of any other credible evidence, compliance is ensured by complying with permit operating, monitoring, and recordkeeping requirements.

b) Particulate matter with an aerodynamic diameter less than or equal to a nominal two point five (2.5) and ten (10) micrometers, including condensable particulate as defined in IDAPA 58.01.01.006.

c) Pounds per hour, as determined by a test method prescribed by IDAPA 58.01.01.157, EPA reference test method, continuous emission monitoring system (CEMS) data, or DEQ-approved alternative.

d) Tons per any consecutive 12-calendar month period.

2.4 Opacity Limit
Emissions from the Hammer Mill stack, or any other stack, vent, or functionally equivalent opening associated with the Hammer Mill, shall not exceed 20% opacity for a period or periods aggregating more than three minutes in any 60-minute period as required by IDAPA 58.01.01.625. Opacity shall be determined by the procedures contained in IDAPA 58.01.01.625.
Operating Requirements

2.5 Throughput Limits
To demonstrate compliance with the PM$_{10}$ emissions limit, the feed throughput through the hammer mill shall not exceed 90 tons per hour (90 T-feed/hr) or 302,000 tons per any consecutive 12-month period (302,000 T-feed/yr).

2.6 Material Screen and Acceptance
The permittee shall not accept any mercury- or PCB-containing/contaminated materials to be processed through the hammer mill. The following unacceptable materials include batteries, gas tanks, tires, radiators, transmissions, capacitors, and transformers (unless specifically marked “non-PCB”).

2.7 Water Injection System Requirement
The hammer mill shall not be operated without the water injection system installed and operating.

2.8 Annual Propane Tank Explosions
The permittee shall not exceed 75 propane tank explosions per any consecutive 12-month period.

2.9 End of Life Vehicle (ELV) Throughput Limit
The end of life vehicles (ELVs) feed through the hammer mill shall not exceed 75% of the throughput limits listed in permit condition 2.5.

Monitoring and Recordkeeping Requirements

2.10 Annual Operating Hours Monitoring
The permittee shall monitor and record daily operating hours of the hammer mill. Records shall show that operation of the hammer mill does not exceed 3,356 hours per any consecutive 12-month period (3,356 hrs/yr).

2.11 Monitoring of Water Injection System
The permittee shall perform an inspection of the water injection system at least once per day of operation for malfunctions, including but not limited to leaks or clogged flow lines and other conditions such as adequate flow rate and alignment of nozzles.

2.12 Water Injection System Operating Log
The permittee shall maintain an operating log for the hammer mill water injection system, including dates and times of inspections, details of observations, malfunctions (type, cause, and measures taken to correct), maintenance, and repairs.

2.13 Materials Receipts
The permittee shall require a “Motor Vehicle, Appliance, & Material Supplier Contractual Certification” of all material suppliers who supply scrap metals to the facility. Records shall show that materials received to be processed through the hammer mill are not contaminated with mercury or PCBs.

2.14 Recordkeeping
The permittee shall comply with the recordkeeping requirements of General Provisions.
2.15 Annual Propane Tank Explosions Monitoring Requirements

The permittee shall record the monthly propane tank explosions over 12-consecutive months to demonstrate compliance with the annual propane tank explosion permit condition.

[10/21/2021]

2.16 End of Life Vehicle (ELV) Throughput Monitoring Requirements

The permittee shall record the hourly percentage of end of life vehicles (ELVs) processed through the hammer mill, and the annual percentage of ELVs processed through the hammer mill in conjunction with the percentage of the mixed scrap and white goods to demonstrate compliance with the End of Life Vehicle (ELV) throughput limit permit condition. The annual percentage shall be summed over 12-consecutive months.

[10/21/2021]
3 Wire Recycling System

3.1 Process Description

This wire recycling system has a fully integrated electrical and dust collection system. This system is designed to process up to 3 tons per hour of the following materials:

- Aluminum-Copper Radiators (both clean and dirty)
- Insulated Aluminum Cables
- Shredder Wire (ICW recovered using FINDERS)
- #1 ICW/Cable (industrial scrap & dealer grade)
- #2 ICW/Cable (industrial scrap & dealer grade)
- Aluminum & Steel BX Cables
- Holiday Lights (Christmas tree lights)
- Zorba Fines
- URD Cables
- Wire Harness
- CAT5 Cables
- TEC Cables
- ACSR Cables
- “jelly” Cables

3.2 Control Device Descriptions

- e) In absence of any other credible evidence, compliance is ensured by complying with permit operating, monitoring, and record keeping requirements.
- f) Particulate matter with an aerodynamic diameter less than or equal to a nominal two point five (2.5) and ten (10) micrometers, including condensable particulate as defined in IDAPA 58.01.01.006.
- g) Pounds per hour, as determined by a test method prescribed by IDAPA 58.01.01.157, EPA reference test method, continuous emission monitoring system (CEMS) data, or DEQ-approved alternative.
- h) Tons per any consecutive 12-calendar month period.

#### 3.4 Opacity Limit

Emissions from the Wire Recycling System stack, or any other stack, vent, or functionally equivalent opening associated with the Wire Recycling System, shall not exceed 20% opacity for a period or periods aggregating more than three minutes in any 60-minute period as required by IDAPA 58.01.01.625. Opacity shall be determined by the procedures contained in IDAPA 58.01.01.625.

#### Operating Requirements

##### 3.5 Annual Throughput Limits

The permittee shall not exceed the following throughput limits:

- Heavy Duty Chopper: 24,615.60 tons per year
- Reinforced Granulator: 24,614.10 tons per year
- Air Density Table: 24,612.60 tons per year
- Sieving Table: 24,611.10 tons per year
- Magnetic Separators: 8,203.50 tons per year

##### Monitoring and Recordkeeping Requirements

##### 3.6 Annual Throughput Limits

Each calendar month, the permittee shall monitor and record the material throughput for the heavy duty chopper, reinforced granulator air density table, sieving table, and magnetic separators for the previous month in tons per month. The annual throughput limits shall be determined by summing the monthly material throughput of each process listed over the previous consecutive 12-month period to demonstrate compliance with the annual throughput limit permit condition.
4 Aluminum Sorter

4.1 Process Description
The aluminum sorter sorts material downstream of the hammer mill. In addition, the facility will receive shredded material from the Pacific Recycling facility located in Billings, Idaho, and Montana, for additional aluminum recovery.

[10/21/2021]

4.2 Control Device Descriptions
The Aluminum Sorter is equipped with a dust collector system for particulate control.

i) In absence of any other credible evidence, compliance is ensured by complying with permit operating, monitoring, and record keeping requirements.

j) Particulate matter with an aerodynamic diameter less than or equal to a nominal two point five (2.5) and ten (10) micrometers, including condensable particulate as defined in IDAPA 58.01.01.006.

k) Pounds per hour, as determined by a test method prescribed by IDAPA 58.01.01.157, EPA reference test method, continuous emission monitoring system (CEMS) data, or DEQ-approved alternative.

l) Tons per any consecutive 12-calendar month period.

[10/21/2021]

4.4 Opacity Limit
Emissions from the Aluminum Sorter stack, or any other stack, vent, or functionally equivalent opening associated with the Aluminum Sorter, shall not exceed 20% opacity for a period or periods aggregating more than three minutes in any 60-minute period as required by IDAPA 58.01.01.625. Opacity shall be determined by the procedures contained in IDAPA 58.01.01.625.

[10/21/2021]

Operating Requirements

4.5 Throughput Limit
To demonstrate compliance with the PM<sub>10</sub> emissions limit, the feed throughput through the aluminum sorter shall not exceed 9,600 tons per year (1.095 T-feed/hr) or 9,600 tons per any
consecutive 12-month period (9,600 T-feed/yr)

[10/21/2021]

Monitoring and Recordkeeping Requirements

4.6 Throughput Limit Monitoring

The permittee shall monitor and record daily tons of material sorted by the aluminum sorter. Records shall show that operation of the aluminum sorter does not exceed 1.095 tons per hour and 9,600 tons per any consecutive 12-month period (9,600 tons/yr).

[10/21/2021]
5 General Provisions

General Compliance

5.1 The permittee has a continuing duty to comply with all terms and conditions of this permit. All emissions authorized herein shall be consistent with the terms and conditions of this permit and the “Rules for the Control of Air Pollution in Idaho.” The emissions of any pollutant in excess of the limitations specified herein, or noncompliance with any other condition or limitation contained in this permit, shall constitute a violation of this permit, the “Rules for the Control of Air Pollution in Idaho,” and the Environmental Protection and Health Act (Idaho Code §39-101, et seq).

[Idaho Code §39-101, et seq.]

5.2 The permittee shall at all times (except as provided in the “Rules for the Control of Air Pollution in Idaho”) maintain in good working order and operate as efficiently as practicable all treatment or control facilities or systems installed or used to achieve compliance with the terms and conditions of this permit and other applicable Idaho laws for the control of air pollution.

[IDAPA 58.01.01.211, 5/1/1994]

5.3 Nothing in this permit is intended to relieve or exempt the permittee from the responsibility to comply with all applicable local, state, or federal statutes, rules, and regulations.

[IDAPA 58.01.01.212.01, 5/1/1994]

Inspection and Entry

5.4 Upon presentation of credentials, the permittee shall allow DEQ or an authorized representative of DEQ to do the following:

- Enter upon the permittee’s premises where an emissions source is located, emissions-related activity is conducted, or where records are kept under conditions of this permit;
- Have access to and copy, at reasonable times, any records that are kept under the conditions of this permit;
- Inspect at reasonable times any facilities, equipment (including monitoring and air pollution control equipment), practices, or operations regulated or required under this permit; and
- As authorized by the Idaho Environmental Protection and Health Act, sample or monitor, at reasonable times, substances or parameters for the purpose of determining or ensuring compliance with this permit or applicable requirements.

[Idaho Code §39-108]

Construction and Operation Notification

5.5 This permit shall expire if construction has not begun within two years of its issue date, or if construction is suspended for one year.

[IDAPA 58.01.01.211.02, 5/1/1994]

5.6 The permittee shall furnish DEQ written notifications as follows:

- A notification of the date of initiation of construction, within five working days after occurrence; except in the case where pre-permit construction approval has been granted then notification shall be made within five working days after occurrence or within five working days after permit issuance whichever is later;
- A notification of the date of any suspension of construction, if such suspension lasts for one year or more; and
A notification of the initial date of achieving the maximum production rate, within five working days after occurrence - production rate and date.

[IDAPA 58.01.01.211.01, 5/1/1994]

A notification of the anticipated date of initial start-up of the stationary source or facility not more than sixty days or less than thirty days prior to such date; and

A notification of the actual date of initial start-up of the stationary source or facility within fifteen days after such date.

[IDAPA 58.01.01.211.03, 5/1/1994]

**Performance Testing**

5.7 If performance testing (air emissions source test) is required by this permit, the permittee shall provide notice of intent to test to DEQ at least 15 days prior to the scheduled test date or shorter time period as approved by DEQ. DEQ may, at its option, have an observer present at any emissions tests conducted on a source. DEQ requests that such testing not be performed on weekends or state holidays.

5.8 All performance testing shall be conducted in accordance with the procedures in IDAPA 58.01.01.157. Without prior DEQ approval, any alternative testing is conducted solely at the permittee’s risk. If the permittee fails to obtain prior written approval by DEQ for any testing deviations, DEQ may determine that the testing does not satisfy the testing requirements. Therefore, at least 30 days prior to conducting any performance test, the permittee is encouraged to submit a performance test protocol to DEQ for approval. The written protocol shall include a description of the test method(s) to be used, an explanation of any or unusual circumstances regarding the proposed test, and the proposed test schedule for conducting and reporting the test.

5.9 Within 60 days following the date in which a performance test required by this permit is concluded, the permittee shall submit to DEQ a performance test report. The report shall include a description of the process, identification of the test method(s) used, equipment used, all process operating data collected during the test period, and test results, as well as raw test data and associated documentation, including any approved test protocol.

[IDAPA 58.01.01.157, 4/5/2000 and 4/11/2015]

**Monitoring and Recordkeeping**

5.10 The permittee shall maintain sufficient records to ensure compliance with all of the terms and conditions of this permit. Monitoring records shall include, but not be limited to, the following: (a) the date, place, and times of sampling or measurements; (b) the date analyses were performed; (c) the company or entity that performed the analyses; (d) the analytical techniques or methods used; (e) the results of such analyses; and (f) the operating conditions existing at the time of sampling or measurement. All monitoring records and support information shall be retained for a period of at least five years from the date of the monitoring sample, measurement, report, or application. Supporting information includes, but is not limited to, all calibration and maintenance records, all original strip-chart recordings for continuous monitoring instrumentation, and copies of all reports required by this permit. All records required to be maintained by this permit shall be made available in either hard copy or electronic format to DEQ representatives upon request.

[IDAPA 58.01.01.211, 5/1/1994]
Excess Emissions

5.11 The permittee shall comply with the procedures and requirements of IDAPA 58.01.01.130–136 for excess emissions due to start-up, shut-down, scheduled maintenance, safety measures, upsets, and breakdowns.

[IDAPA 58.01.01.130–136, 4/5/2000]

Certification

5.12 All documents submitted to DEQ—including, but not limited to, records, monitoring data, supporting information, requests for confidential treatment, testing reports, or compliance certification—shall contain a certification by a responsible official. The certification shall state that, based on information and belief formed after reasonable inquiry, the statements and information in the document(s) are true, accurate, and complete.

[IDAPA 58.01.01.123, 5/1/1994]

False Statements

5.13 No person shall knowingly make any false statement, representation, or certification in any form, notice, or report required under this permit or any applicable rule or order in force pursuant thereto.

[IDAPA 58.01.01.125, 3/23/1998]

Tampering

5.14 No person shall knowingly render inaccurate any monitoring device or method required under this permit or any applicable rule or order in force pursuant thereto.

[IDAPA 58.01.01.126, 3/23/1998]

Transferability

5.15 This permit is transferable in accordance with procedures listed in IDAPA 58.01.01.209.06.

[IDAPA 58.01.01.209.06, 4/11/2006]

Severability

5.16 The provisions of this permit are severable, and if any provision of this permit to any circumstance is held invalid, the application of such provision to other circumstances, and the remainder of this permit, shall not be affected thereby.

[IDAPA 58.01.01.211, 5/1/1994]
