## 6. EXACT PLANT LOCATION
BOISE WAY AND GOWEN ROAD

## 7. GENERAL NATURE OF BUSINESS AND KINDS OF PRODUCTS
SOLVENT STORAGE AND TRANSFER FACILITY

## 8. GENERAL CONDITIONS
This permit is issued according to the Rules and Regulations for the Control of Air Pollution in Idaho, Section 01.1012, and pertains only to emissions of air contaminants which are regulated by the State of Idaho and to the sources specifically allowed to be constructed by this permit.

This permit (a) does not affect the title of the premises upon which the equipment is to be located, (b) does not release the permittee from any liability for any loss due to damage to person or property caused by, resulting from, or arising out of the design, installation, maintenance, or operation of the proposed equipment, (c) does not release the permittee from compliance with other applicable local laws, regulations, or ordinances, (d) in no manner implies or suggests that the Department of Health and Welfare, or its officers, agents, or employees, assumes any liability, directly or indirectly, for any loss due to damage to person or property caused by, resulting from, or arising out of design, installation, maintenance, or operation of the proposed equipment.

This permit is not transferable to another person, place, piece or set of equipment. This permit will expire if construction has not begun within two years of its issue date or if construction is suspended for two years.

**THIS PERMIT HAS BEEN GRANTED ON THE BASIS OF DESIGN INFORMATION PRESENTED WITH ITS APPLICATION. CHANGES OF DESIGN OR EQUIPMENT MUST BE APPROVED IN ADVANCE BY THE DEPARTMENT.**

**ASSISTANT ADMINISTRATOR**

**PERMITS AND ENFORCEMENT**

**DATE**

July 13, 1992
1. SOURCE DESCRIPTION

This facility is a solvent distribution service center which provides clean solvent and collects spent solvent. Some drums of used solvent are emptied, washed and refilled at this facility. The used drum solvent is temporarily stored on site in the 12,000 gallon spent solvent storage tank. Other containers of solvent waste are also temporarily stored at this facility, but are never opened on site. A tanker and trailer truck brings clean solvents from the refinery and then returns with spent solvents.

1.1 Warehouse and Container Storage Area

5,000 square foot warehouse which stores a maximum of 4,464 gallons of spent solvents in closed drums.

1.2 Tank Farm and Return and Fill Area

Two (2) 12,000 gallon above-ground fixed roof storage tanks. One tank stores clean solvent and the other stores spent solvent.

1.3 Solvent Return and Fill Station

A loading dock, two (2) 375 gallon receiving and washing units, two (2) multiple solvent dispensing units connected to four (4) dispensing nozzles with automatic shut-off valves.

1.4 Flammable Shelter

A maximum of 2,592 gallons of containerized paint wastes is stored in this building.
2. EMISSION LIMITS

2.1 Daily Toxic Emissions Limited

Toxic emissions shall be limited to the following as required by IDAPA 16.01.01011,01 (Rules and Regulations for the Control of Air Pollution in Idaho):

2.1.1 2.5 pounds of 1,1,1-TCE (trichloroethane) per day;
2.1.2 0.17 pounds of ethylbenzene per day;
2.1.3 0.25 pounds of xylenes per day; and
2.1.4 0.49 pounds of toluene per day.

3. OPERATING REQUIREMENTS

3.1 Drum Washing Limited

In order to comply with toxic emission limits, the total number of drums washed per day shall be limited to:

3.1.1 A maximum of 50 drums having a capacity of 30 gallons; and
3.1.2 A maximum of 80 drums having a capacity of 16 gallons.

4. REPORTING REQUIREMENTS

4.1 Maintain a Log

Safety-Kleen shall maintain a log that documents Conditions 3.1. This log shall be made available to DEQ personnel upon request.
PERMIT TO CONSTRUCT GENERAL PROVISIONS

A. All emissions authorized herein shall be consistent with the terms and conditions of this permit and the Rules and Regulations for the Control of Air Pollution in Idaho. The emission of any pollutant in excess of the limitations specified herein, or noncompliance with any other condition or limitation contained in this permit, shall constitute a violation of this permit and the Rules and Regulations for the Control of Air Pollution in Idaho, and the Environmental Protection and Health Act, Idaho Code 39-101, et.seq.

B. The permittee shall at all times (except as provided in the Rules and Regulations for the Control of Air Pollution in Idaho) maintain in good working order and operate as efficiently as practicable, all treatment or control facilities or systems installed or used to achieve compliance with the terms and conditions of this permit and other applicable Idaho laws for the control of air pollution.

C. The permittee shall allow the Director, and/or his authorized representative(s), upon the presentation of credentials:

1) To enter at reasonable times upon the premises where an emission source is located, or in which any records are required to be kept under the terms and conditions of this permit; and

2) At reasonable times to have access to and copy any records required to be kept under the terms and conditions of this permit, to inspect any monitoring methods required in this permit, and to require stack emission testing in conformance with the Department's Procedures Manual for Air Pollution Control when deemed appropriate by the Director.

D. Nothing in this permit is intended to relieve or exempt the permittee from compliance with any applicable federal, state, or local law or regulation, except as specifically provided herein.

E. The permittee shall notify the Idaho Air Quality Bureau, in writing, of the required information for the following events within five working days after occurrence:

1) Initiation of Construction - Date
2) Completion/Cessation of Construction - Date
3) Actual Production Startup - Date
4) Initial Date of Achieving Maximum Production Rate - Production Rate and Date

F. If emission testing is specified, the permittee must schedule such testing within sixty (60) days after achieving the maximum production rate, but not later than one-hundred and eighty (180) days after initial startup. Such testing must strictly adhere to the procedures outlined in the Department's Procedures Manual for Air Pollution Control, and will not be conducted on weekends or state holidays. Testing procedures and specific time limitations may be modified by the Idaho Air Quality Bureau by prior negotiation if conditions warrant adjustment. The Idaho Air Quality Bureau shall be notified at least fifteen (15) working days prior to the scheduled compliance test. Any records or data generated as a result of such compliance test shall be made available to the Department upon request.

The performance tests will be performed at the maximum production rate. If this maximum rate is not achieved during testing, the allowable production rate will be limited to the production rate attained during testing.

G. The provisions of this permit are severable, and if any provision of this permit to any circumstance is held invalid, the application of such provision to other circumstances, and the remainder of this permit shall not be affected thereby.
